History

Geography

A young girl with red hair tied back, wearing a white school uniform and a pearl necklace, is looking down at a science experiment. She is holding a test tube. In the background, there is a Bunsen burner on a stand. The image has a soft, blue-tinted overlay.

How We Teach-Online Learning Approach

At Caplora International School,
our approach to online learning
is designed to deliver an
immersive and engaging
educational experience tailored
to every student's unique needs.
Here's how we do it:

hello@caplora.co.ke

Nairobi, Kenya

Interactive Virtual Class

Our live, interactive virtual classes bring the classroom to your screen, fostering real-time engagement between students and teachers.

Personalized Learning Experience

We understand that each student learns differently. Our educators personalize the learning journey, adapting teaching styles and materials to suit individual learning preferences and paces.

Cutting-Edge Technology Intergration

Leveraging cutting-edge technology, we provide a seamless digital learning environment, integrating multimedia resources, interactive tools, and innovative platforms.

Small Class Settings

In small class settings, students benefit from focused attention, fostering a collaborative and supportive atmosphere for active participation and individual growth.

Flexible Timetable-available for only 1-on-1 Students

Our live, interactive virtual classes bring the classroom to your screen, fostering real-time engagement between students and teachers.

Active Student Community

Our virtual learning environment extends beyond the classroom, offering students a vibrant online community to collaborate, share ideas, and engage in extracurricular activities and clubs.

Continuous Support and Guidannce

Our dedicated faculty and support staff are readily available to provide guidance, support, and assistance, ensuring a smooth and enriching online learning experience for every student.

Continuous Support and Guidannce

Our dedicated faculty and support staff are readily available to provide guidance, support, and assistance, ensuring a smooth and enriching online learning experience for every student.

At Caplora, we've reimaged online education to deliver a dynamic, interactive, and personalized learning journey, transcending the traditional boundaries of a virtual classroom

Student Community

One misconception about online learning is that it's isolating, depriving students and staff of the camaraderie that a physical school can offer. The reality is quite different.

Virtual Clubs

Our Virtual Clubs offer learners an online space to explore their interests, hobbies and knowledge with like-minded peers.

Our key focus areas are Well-being, Creativity, Skills Development and Special Interests.

They provide learners with the opportunities to learn new skills, get creative, build online communities, develop leadership skills and most importantly, have fun!

Examples

World Scholar Competition: Fostering academic excellence

Duke of Edinburgh (President Award): Personal development through diverse challenges

Junior Achievement: Inspiring young minds for success in a global economy

Chess, Debating, Gaming, YouTube, STEM Club: Exploring diverse interests

International Club (Model United Nations, etc.): Global engagement and discourse

Athletics

Because learning at Caplora takes place virtually, many schools allow students to play for their local neighborhood teams. In addition, we have a school managed sports program in Kenya (Nanyuki and Nairobi) and partnering with local clubs in different countries.

Field Trips

Our voluntary field trips give your child a chance to experience these amazing places firsthand. From historical sites to companies, the great outdoors and so much more, your child can go on adventures alongside their fellow students, exploring, learning and having fun together on school trips.

Life Beyond Caplora

We know that school is just a stepping stone, which is why Caplora has a suite of dedicated career guidance services to help learners make the best decisions possible. We'll help you find your passion, whether that's getting into university, landing your dream job, or becoming the next global music icon. Our purpose is to inspire students to reach their full potential, guiding them through subject selection and exposing them to a variety of career options

Carrer and Technical Educational Program

Today, more than ever, employers want to hire entry-level employees who can hit the ground running. This is where career and technical education (CTE) comes in. CTE is a broad term for education that combines academic and technical skills with the knowledge and training needed to succeed in today's labor market. CTE prepares students for the world of work by introducing them to workplace competencies in a real-world, applied context.

Career Pathways

- **Health Science:** Preparing for diverse healthcare professions
- **Business:** Exploring finance, management, and international trade
- **Information Technology:** Navigating the world of technology and programming
- **Visual Communication:** Blending visual disciplines for innovative solutions
- **Manufacturing, Engineering & Technology:** Preparing for STEM-based careers

University Counseling

We encourage and support learners to ex-plore various university majors and careers through an integrated approach.
